

Atmospheric Vessels

CPPE designs and supplies atmospheric vessels based on site requirements appropriate to production volumes.

For ease of transportation, we pre-fabricate the large tanks in our workshops and erect them at client plant site.

Types:

- Bolted Tanks
- Mud Tanks
- Storage Tanks

Bolted Tanks

Application:

- Produced water and corrosive chemicals.

Features:

- Low-cost
- Ease of shipment to remote locations
- Fast field assembly
- Low maintenance
- Long operating life
- Reliable containment
- API Code

Mud Tanks

Application:

- storage and/or active agitation of drilling mud

Features:

- Cubical open or close top steel tanks

Storage Tanks

Application:

- Crude oil produce water and chemical storage tanks

Features:

- Built to API 650
- straight shell
- conical roof supported with appropriate column and rafters bolted type construction
